in all Changes and every Re-  
volution of Time, since first acquaint-  
tance 1646. hath continued (*Semper*  
*idem*) this Annual Astrological dis-  
course is dedicated, by W. Lilly  
Student in Astrology.

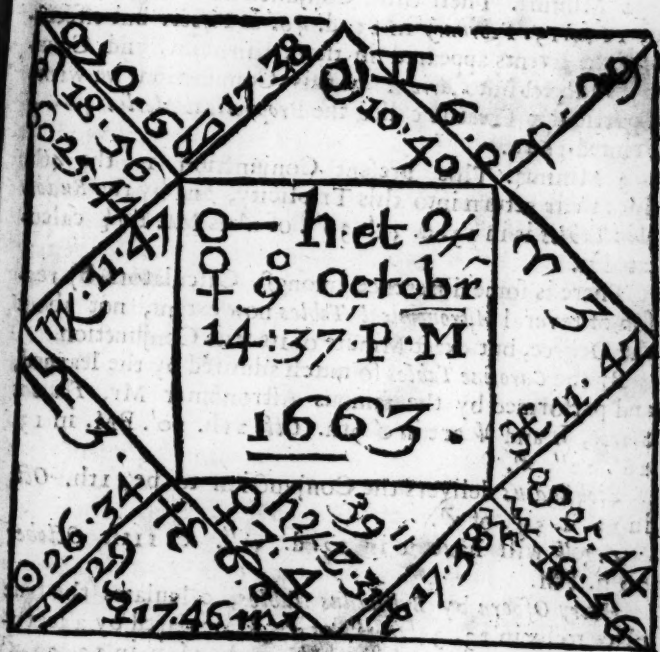

# Astrological Judgments for the Year 1664.

By William Lilly Student in Astrology.

*Planetae, imperio legis aeternae procedunt.*

WE intend not to be either profuse in our words or expressions, thereby to amuse the World with those

A 2

Events

## *Astrological Judgments.*

Events which may proceed from the effects of this Minor or least Conjunction of *Saturn* and *Jupiter*; for it being the 4th. Conjunction in order since their first entrance into the fiery Trigon, it cannot have signification of so stupendious accidents as some have dreamed off.

♄ Media. Know then that these 2 Superiour Planets returned into this fiery Triplicity in 1603. the 7th. of *Decemb.* of that year, and made their first Conjunction in 7. d. 58'. ♄.

1. Minima. Their second Conjunction was celebrated according unto *Kepler* 1623. 7th. *July* — in 6. d. 45'. of *Leo*. —

2. Minima. Their third Conjunction was made 1642. or 1643. 15. *February* in 25. d. 46'. of *Pisces*: but effectually the Events appeared in those Kingdoms and Countreyes subject unto *Aries*: of this Conjunction we wrote a particular Treatise called the *Prophetical Merlin* — Printed 1644.

3. Minima. This present Conjunction is the 4th. since their return into this Triplicity, and by the *Rudolphin Tables* is in 13. d. 31'. 39". of ♄ as Mr. *Fiske* calculated it.

There is some difference amongst Calculators by reason of several *Astronomical Tables* now extant, not about the Degree, but exact Minute of its true Conjunction.

By the *Caroline Tables* so much admired by the learned, and performed by the famous Astronomer Mr. *Thomas Street*, ♄ and ♃ are in 9th. *Oct.* 21h. 20'. PM. in 13. 26'. 22". ♄.

*Eichstadius* delivers the Conjunction to be 11th. *Oct.* in 13. d. 50'. of ♄.

*Argoll* will have it in 13. d. 51". ♄ 11th. *October* 20 h. PM.

*Henry Osborn* by *Bullialdus Tables*, calculates the true place to be in 13. 35'. 25". of ♄. Calculated by a learned hand from the *Richelieu Tables*, the ♄ is in 13. 33' 10. *Oct.* 13 h. 13' PM. and then 17 ♄ ascends. By reason of

## Astrological Judgments.

of the slow motion of these 2 Planets, *Cardanus*, and after him many sober *Artists* do maintain its not possible to have the very exact time of  $\text{h}$  and  $\text{v}$  their Conjunctions.

The position of Heaven we have printed, was performed by *Matthew Fisk*, in memory of whose Civilities we could do no less than publish it, there being nothing else remaining of his labour that ever came to our hands: though we may not warrant the Scheam to be exactly true, yet if we give any credit unto the *Animodar* of *Ptolomey*, it will appear not to be far from truth, for in the *Lunation* preceding this Conjunction, we find the *Luminary* that is above the Earth to be the *Luna*, and she in the 23. degr. of *Aries*, wherein *Mars* hath most fortitudes, and he in the Scheam of this Conjunction is in the 9th. deg. 6'. of *Leo*, ——— and so not fully 2 degrees less than the degree ascending, an error easily reconciled — we Confide not much in the position, but shall onely make use of the Longitudes of the planets, as they are at the time of the Conjunction: for since the effects from hence to be deduced will not immediately succeed; we shall obviously in this year, and every other year succeeding, take notice thereof: for we take the Conjunction it self to be like a Byrth, which by time and Order of nature at length comes to perfection, or to perform what the wise God of Nature hath ordained it for: assuredly we may believe that the  $\odot$  is a Byrth, the separation of these 2 planets presently after their Conjunction, may be assimilated unto the Infancy of the Child, or their first aspect unto its education; their *Quadrat* aspect unto those years next succeeding the years of Instructions; their first Tryne Aspect unto almost a perfect Man, ripe in strength and understanding: their Opposition may be compared unto that point of time wherein a Man is lusty, full of Vivacity and Spirit, willfull and valiant, and wherein he is in a capacity of doing himself good or ill, for the future part of his life, if he Subject his will unto reason: but for the most part Man in his

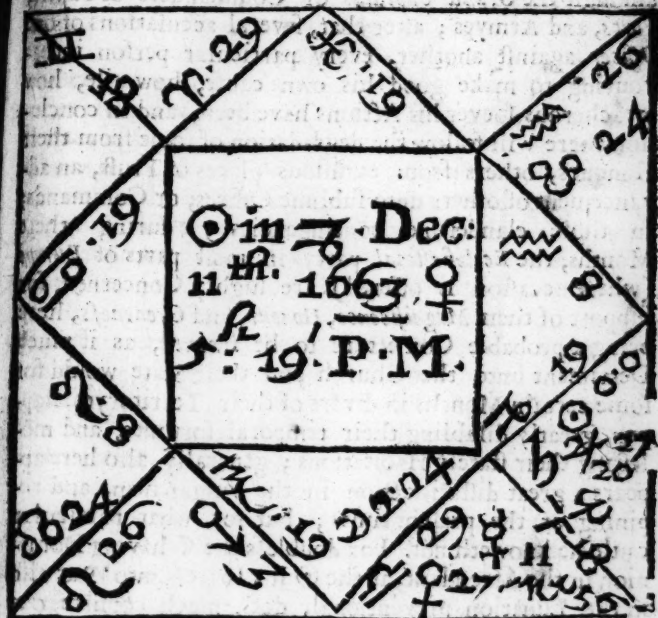

### *Astrological Judgments.*

Actions is governed more by sense than reason; those aspects of the Superiours happening after opposition, do manifest the declining part of mans life even unto his Grave; but enough, if not too much hereof &c.

Two remarkable things happened in *Europe*, upon the entrance of these 2 planets into the fiery Trigon, in 1603. — First an Union of *England* and *Scotland* into one Monarchy — Secondly in 1607. The *Hollanders* were treated with as a free State, who before were in quality of Subjects &c. In this our present Conjunction it cannot be denied, but that ♃ is best fortified; from thence therefore we may expect much happiness, and good effects, generally in their due time tending unto tranquillity, especially unto those Nations subject unto the fiery Trigon, i. e. who are not vitiated with presence of the Infortunes; if our figure be exact, an happy accommodation may succeed the ☿. *quia h ♃ ♀ in 4ta. sed cum quadam difficultate & prolongatione, viz.* not without much difficulty and after some years.

But it is our intention to intermix this years Astrological Judgments both of the ☉ his Ingress into ♍ 1663. and into *Aries* 1664. and of that total Eclipse of the ☾ in *July* 1644. — with our observations contingently in relation unto the ☿ of ♌ and ♍. —

# Astrological Judgments.

The planets are here in this Scheam subterranean, and therefore will very well signify or represent the close Actions and secret Contrivances of part of *December, January, February, and March*: the Actors upon the Stage of *Mankind* are the *Grandeess of Europe*, every one in his particular Sphear, from the King even unto every publick Officer, in any degree or quality of Command, whether Civil or Ecclesiastical: the most material accident herein represented near these times, is some Restriction or Check unto the Grandure of the *French Martial* proceedings, where ever their Armyes are, either in Garrison, Action, or probably near unto it; from hence will

### *Astrological Judgments.*

will arise high quarrells and suspicions of *Legerdemain* amongst the *Grand Captains* or *Commanders of Castles, Forts,* and *Armies*; after that, several accusations of one *Officer* against another, every particular person endeavouring to make good his own cause, how vile, how treacherous soever his Actions have been, and in conclusion there will follow the degradation of some from their Honours, others from eximious places of Trust, an advancement of others unto sublime Offices, or Commands; in those clandestine contingencies, during these Months, the *Ecclesiastical* party in most parts of *Europe* (where occasion is offered) are highly Concerned, for support of their *Magnificence, Honour,* and *Greatness*, here being a probable Conjecture to be framed, as if much Detriment unto the Church and their State would for some certain Months in divers of their Territories happen, greatly disabling their temporal fortunes, and molesting their stately Habitations; generally also here appears a great dissatisfaction in the vulgar man, and repining at the present times, but for what particular cause he knoweth not. For doublets the ☾ having Dominion in the Ascendant, at the ☉ his Ingress into ♍ as also in the Lunation preventionall, doth much confirm our judgment concerning the Commonalty of Nations, or vulgar man his carriage these 3 Months, and further sayth, *significat veloces mutationes hominum de loco ad locum, de una re ad aliam, de uno proposito ad aliud; viz.* the Common people will with much suddenness remove from one place unto another; some Zealots perhaps may transplant themselves into forein parts, or change their habitations unexpectedly, and suddenly vary their minds from one intended matter unto another, from one purpose unto another; their minds will quickly vary, crying *Hosanna* this Month, and crucify the same person the next, or in more plain terms, will cry up this Nobleman, this Gentleman to day, and to morrow as fast cry him down; as also that they will earnestly in all Countries

## *Astrological Judgments.*

eyes where these effects take place, be supplicating their Superiours for Acts of grace one after another, yet seldom contented with any *Grant* or *Desire* they obtain, so that Magistracy seems tyred or wearied with their so frequent complaints, &c.

For the position of the ☾ in the 4th. in ☐ aspect unto the Sun in Cardinal signs, doth manifest that neither the Actions of the latter end of 1663. or these of *January*, *February*, and *March* will please the multitude; but these Actions should especially take place in *Holland* and other adjacent Countreyes, or where there are Armies near unto one another, as also in the *Venetian Territories*, and *Ottoman Kingdoms*; of these people or in those Countreyes we have mentioned, many shall extreamly suffer by *Piracy*, *Shipwrack*, *Storms* and *Tempests*, greatly unto the prejudice of those Country Merchants, who shall trade into the *Straits*, and other places adjacent; or under the Government of the *Spanish Monarchy*: we must needs confess that both the influence of the present ☽ of h and ♀ and some other succeeding configuration do give Caution unto the *See of Rome*, or unto the Ecclesiastical patrimony of *St. Peter*, of great Calamity and sufferings ensuing for some Months unto the *Churches Subjects*, their *Lands*, *Territories* and *Principalities*, if God of his goodness do not permit some honourable Grandees to terminate that Animosity which at present possesseth the *Monarch of France* against the present Church of *Rome*, of whose actions occasionally we shall in the subsequent discourse deliver our judgment as well for good as ill unto either party as at present concerned.

For the condition of affairs and transactions at time of this Conjunction in *Oct. 1663.* stands thus in *Europe*, His Majesty of *France* in a seeming amity with all Nations (except *Alexander* the present Pope) the issue of their transactions is expected. His Majesty of great *Brittany* very happily in peace and friendship with all his Neighbours in every part of *Europe*, being possessor of *Tanger* in *Africk*,

## *Astrological Judgments.*

*Africk, Jamaica, and many noble Islands in the west-Indies.*

The Spanish King involved in a War with Portugall, not hitherto successfull or like to be in future. —

The King of Poland having lately been reconciled unto the Confederats or they unto him, seems at peace in his own Territories (*utinam*) but is threatned by the Muscovite and Tartars.

The Turk and Venetian State engaged allready in a seaven years War; that people not much assisted by any State of Europe, yet support their own greatneses, and are like so to do.

The Emperour and some of his Territories threatned with a War from the Turk, some say they are in Actual hostility, its since this was writ confirmed they are so.

The Kings of Denmark, and Sweden at present in peace, but how long it may continue 1666. will manifest.

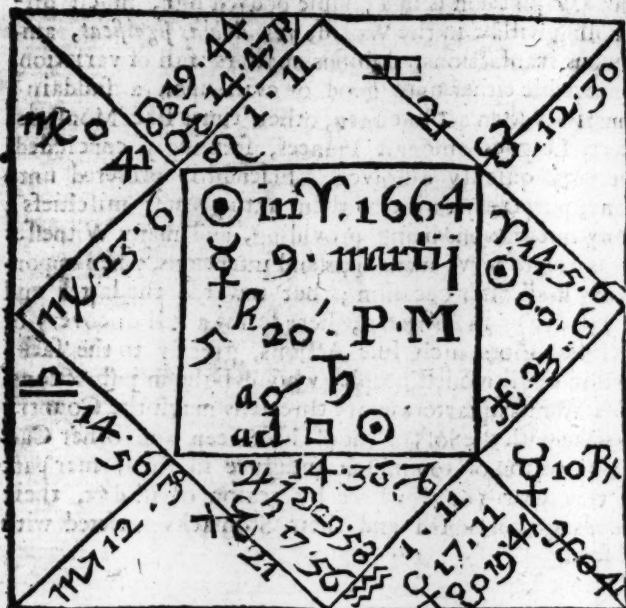

The Hollander (as we hear having generally at present peace with all the Monarchs of Europe) onely molested with the Alger Pyrats; thus or almost in such terms is the present condition of Europe in Oct. 1663. We mention these things, that posterity may observe hereafter, from what progress in this Conjunction, or from what aspect of these Superiours, or from what Eclips, Comet, or Prodigy any further alteration ensuing shall come or manifest it self in Europe either good or evill, which may probably be conjectured to have signification from any the beforementioned Causes. 1. We did the same in our Treatise of the last  $\phi$  of  $h$  and  $\psi$  1642. or 1643. for it is, the judgment of *Hermes Apho.* 51. — *oporlet futura considerare a conjunctionibus planetarum, praesens vero vel praeterritum a separationibus eorundem:* in Accidents to come, require judgment from the Conjunctions of the planets, but the present time or actions of the present times, or what was formerly acted, therein consider the r separations; and this certainly is of great use in Astrological Judgment concerning the general affairs of this World.

This

### *Astrological Judgments.*

This Conjunction is in a double bodyed sign, much dissembling will be in the World, *res dubias significat*, ambiguous transactions, dubious matters full of variation, convertible either unto good or evil upon a suddain; sometimes Men act like Men, other times like Monsters, Peace, Leagues amongst Princes, seemingly concluded, but very quickly dissolved. Friendship profered unto many, purposely to intrap them unto greater mischiefs; many Accusations being providing, and many Witnesses preparing to serve mens ends and intentions, when opportunity shall offer occasion; but towards the latter end of January or in February, here seems a full discovery of such like Plots, such like Actions, greatly to the satisfaction of all modest people who delight in just Actions. This Winter quarters figure threatens much the Country Farmer with the loss or rot of his Sheep and other Cattle, by reason of too much moisture in the former part of this year 1663. where by reason of ill diet, their bloods are corrupted and their Stomacks surfered with ill food.

# Astrological Judgments.

The Spring being approached we must enter upon Action, the rather, for that the Planet Mars who hath been Retrograde since the 26th. of December 1663. is now hastening unto Direction, having in this Retrograd motion gon backward out of *Virgo* 4. degr, 9. m. unto the 14. d, 36'. of *Leo*, even in all 20. d. and 45'. he by his now direct motion, performing this Summer what was in design all the Winter preceding, or recruiting some miserable half starved Souldiers with Provisions for back and belly, for assuredly their seems a great mortality either by Sword or Famine to have happened amongst those unhappy military men, who either had Quarter or abiding near or upon the borders of *Italy*, or towards the *Alpes*, as also in some of those Countreyes belonging unto the *Empire* of *Germany* bordering near *Hungary*. This may

## Astrological Judgments.

may seem a sad position unto *Rome*, if that Citys Ascendant be rightly recorded by *Gauricus*; but the Eclips in *July* is not so much averſe unto her Grandure, it ſhews recuperation or honour unto her and Governours. *Anonim. 25. Ap. Degenerant à propria natura planetæ Retrogradi & mali ſunt deteriores*, intimating thereby the diſorder and unrulyness of the Martial party near this time, their unwillingness to ſubmit unto their Officers and Commanders.

In the preventional full ☾ we find *Saturn* near the Angle of the East and *Jupiter* intercepted: *Efficaciſſimi ſunt planetæ ſuperiores*: The 2 Superiour planers being both in one Angle, have moſt powerfull influence upon ſuch actions as then are in agitation in any Country where their influence and power takes place, their influence is more remiſs when in Cadent houſes: we cannot conſide in aſſigning *Mercury* wholly Lord of the Spring quarter; with more reaſon ♄ and ♀ may challenge the greater prerogative, being angular in both figures, and abſolutely commanding in the preventional figure; for ♄ both before the Ingreſs by Retrograd motion gave his virtue to ♀ and afterwards alſo he being his Diſpoſitor viz. Lord of ♄ in *Piſces*.

Something near the Ingreſs (but rather before) ſeems to have happened of concernment, viz. ſome high Military perſon either degraded, or in much diſgrace, or in danger of Death by a long lingering infirmity, or ſome Martial Stratagem prevented or miſcarrys by negligence of the Supream Officer, or averſeneſs of the Souldiery in general; the minds of men in Supream Authority, or the great *Grandeets of Nations*, as well Civil as Military entring upon high Actions, ſuperlative Controverſies and Counſells. —

*Paper quarrels*, or verbal affronts begin to be diſperſed by malicious perſons, much unto the diſturbance of *Magiſtracy*, — *Libels* or Scandalous Books ſtuffed with inveterate malice and odious Calumnies are diſperſed plentifully, to make good a *Clamorous Cauſe*, here ſeemas Faction, and ſiding, party againſt party, *Grandeet, Nobleman,*

## Astrological Judgments.

man, Souldier, Ecclesiastick and Long Roab, one amongst and against another.

De  $\odot$   $\text{h}$  &  $\text{v}$ . But what Great matter or thing shall be signified by the position of three planers in *Sagittarius*, in the Conjunction of  $\text{h}$  and  $\text{v}$ , we must with Caution discover or treat of, for we are Commanded thus

*Cum videris tres planetas fortes in triplicitate ignea, non festines iudicium, nec idem tradas in rebus parvis.*

When we find 3 planets well fortified in the fiery Trigon, make not hast to give judgment, nor do deliver thy opinion in small matters: here we have 4 planets in the fiery Trigon, viz.  $\text{h}$   $\text{v}$   $\text{q}$  in  $\text{♊}$  and  $\text{♋}$  in  $\text{♏}$  all in a platick Trine, and out of good houses (if we may confide in our Scheam of Heaven.)

It were a miracle (the present Animosities of *Europe* being so great) if a general peace presently from the effects hereof should succeed; and yet after some small time such a thing is presignified, for if *Saturn* being near *Jupiter*, doth or may by men or matters *Saturnine*, viz. deceit, malice, frowardness, impede the sober intentions of *Jupiter*, viz. good men for a time; yet if Antiquity understood any thing, in the end it will be otherwise; for *Quicquid ligat Saturnus solvit Jupiter*, viz. where the deceit of *Saturn* operates, there the wisdom, honesty, or Religion of *Jupiter* will at length overcome; which imports no more but this, that though a Coverous self-ended generation of people in all parts of *Europe*, especially in Princes Courts, for their own ends, lucre and gain, do maliciously at present confront and impede the wholesome Counsellors of some prudent and Religious State-men or Counsellours, and with their niceties and curious, willfull and treacherous designments, obstruct all sober intentions, or modest persons inclining unto a general peace in every Nation; yet at length a Peace shall follow, and the honest sober States-man shall prevail, and conclude such a Peace or Friendship as shall be pleasing unto all *Christendome*: but not in this year 1664. though several

## Astrological Judgments.

several indeavours may be used for that end, viz. composition of differences.

Towards the accomplishment of this hoped for Tranquillity, those Noble Heroes of the Law or Long Robe, and also those learned men commonly called Doctors of the Civil Law, in all the Countreyes and Nations, or people of Europe, will be exceedingly advantageous and assisting, so will the learned Clergy of all Nations, both Protestants and Catholics, yea every Order of Religion, and all sorts of Judgments in all Kingdoms and Commonwealths be extream in their desires, and industrious in their Persons, to terminate and Conclude a glorious and happy Peace over all Christendome. But whether the necessity of the then present times will enforce them unto such an high Charity, or some sudden fear of a general Enemy at hand, or what is most like to be the onely moving cause, viz. That the Spirit of the most high will direct and dictate into their understandings such happy means, and successfull opportunities, as that they shall be most willingly inclined to Act, and in the end most miraculously to conclude, those then boysterous storms which shall be in Europe impending, which if not calmed, might totally disquiet or indanger the whole Christian Faith professed all over Europe.

And whereas now in the entrance of this Conjunction, the Military Man in several Nations is exceedingly prone to Arms, assuredly God will take off by many vertuous Men their Mediations, his light of Courage and inclination unto War or Slaughter, more particularly by Men or Means Venerian, that is, by moderate and ingenious persons, or a desire in themselves, viz. Souldiery, of possessing their Wives Lands and Fortunes in quietness and freedome; and this is materially signified, by that Sinister plattick Trine Mars hath unto Saturn and Jupiter, and also from that harmonious consenting Trine dexter of Venus unto Mars, which evincerh, that nothing will in these times more prevail with the

### *Astrological Judgments.*

the Souldiery for accommodation of Peace, than after their many years labour and hardship to accompany *Venus*, that is to delight themselves w<sup>th</sup> the repetition of their former hardships; and now in their declining years, to sit quietly each Souldier in his own Country, enjoying his own Wife and part of that Estate he hath to often adventured his life for: *Venus* is also in her own Terms, which shews the will and desire of that generation of people signified by her, unto quietness; and *Mars* is in the Terms of *Mercury*, intimating good Edicts; good language, excellent wits, will overcome the Martial Man, and Convert his thoughts unto Conditions of Peace.

For *Quarum rerum significatrix est media Conjunctio* (and that was celebrated in 1603. 7 December) earundem quoq; rerum certiore ac manifestiore indicationem affert *Conjunctio minima*, siquidem ea quæ quam proxima sunt, singulatim distincteq; cernuntur, & tanquam digitis tractata particulatim numerantur, itaq; minima *Conjunctio* res nobis à maxima vel media conjunctione per rebulam quasi quandam præsignatas, ante oculos ipsos videtur exponere, expositasq; explicatim distincteq; notare &c. Pontan. 115. —

Of what matters or accidents the greatest or mean Conjunction is significatrix, of those very things the little Conjunctions succeeding make a more manifest and certain indication, since those things which are most near are more distinctly and particularly made visible, yea so particularly as if they were numbred and pointed at with our fingers; therefore this lesser or least Conjunction of  $\text{♂}$  and  $\text{♂}$  seems to unfold or expound those designed matters unto us præsignified from the last greatest or mean Conjunction, as it were by a certain Cloud or mist, which matters being once unfolded, the less & doth denote them more distinctly, clearly, and apparently. The meaning of our Authour is onely thus much, that what matters divine providence intends, from either the greatest Conjunction which is very rare, and but once in almost 795 years; or from the middle or mean Conjunction

### *Astrological Judgments.*

junction of  $\text{h}$  and  $\text{V}$  which is once in or about 199 years, or 198 years and some odd dayes. That or these accidents, after some space of time are discovered more manifestly from these little or lesser Conjunctions succeeding, which are once in 19 years, and more then 318 dayes or thereabouts.

From hence we say and probably conjecture, that as the effects of the mean Conjunction 1603. in many Countreyes did produce pease, and more particularly betwixt England, Spain and Scotland; so we may say now in this  $\text{O}$ , because *Venus* transfers the virtue of *Mars* unto  $\text{h}$  and  $\text{V}$  by her application unto their  $\text{O}$ ; so we may very well hope that the *irascible* part of man, or the revengefull acrimony of several Martial Spirits, will by Humanity, and men prudent, be so asswaged, as that after a few unnatural Wars or Paper-quarrels, an attonement, or friendship shall be made and succeed. In the mean  $\text{O}$  of  $\text{h}$  and  $\text{V}$  1603. *Mars* was then in the 9th. House in  $\text{A}$ . A vivacious Ecclesiastical contentious Spirit in the Religious of all Nations near that time seems to have impeded any general settled peace, or else different judgments in things Religious, gave check to the desires of Princes, willing of themselves to have lived in Peace; and these things were obstructed by Mercurian devices and Divines, viz. witty Disputes, various Books, several Controversies imprinted, rather poisoning than satisfying the Consciences of the people in general, or setting people at further distance than at first separation.

For if in 1603. that mean Conjunction was celebrated in the then ascending sign or Horoscope, which shows the beginning of things, but difficultly & with labour, because of  $\text{h}$ , in this of 1663.  $\text{hVQ}$  are in the 4th. house (as we believe) and that is or signifies the end of all things, and so it may give hopes that the influence of this  $\text{O}$  will give a period unto all Quarrels, begun either about that time viz. 1603. or since untill now 1663. But not suddenly, we say, *There is a time for all things*,  $\text{Q}$  and  $\text{O}$  being in one Tri-  
plicity,

### *Astrological Judgments.*

plcity, and the within 2 degrees of his perfect Trine may give some hopes of concluding many differences in *Europe* within 2 years, or things near an accommodation in *Italy* and parts adjacent; yet the planet ♀ being distant in equal degrees from the body of ♃ 6 d, 27'. may denote from the time of this Conjunction of 1663. 6 years and almost a half, viz. that in or about the year 1668. but more naturally 1669. there will be either a settled peace, or an universal desire in all the *European* Princes for peace; and happily an union in most, if not all the *Monarchies* of *Europe*; as yet the dreggs of discontent or fear of new troubles doth seem to be designed from *Spain*, or that Kingdom to be the place, a *Quo*; but whether it will be about dividing that Monarchy, or Succession, or Invasion, even of *Spain* it self, time will manifest.

For although there will not want very pious mens endeavours 1665. towards the latter end of that year, to make a general peace, or to frame mens minds (we mean of *Princes*) unto serious inclinations of Peace, or willing accommodation thereof; yet will the Commissions or instructions of those learned Souls who act, be so limited or they so restrained, and their instructions, so curtail'd that no successfull issue is like to attend their *Industry*: but in 1668. or 1669. all Princes either weary of war and bloodshed, or their inclinations so ordered by divine Providence, and great sollicitations of the pious Ecclesiastical party generally in all Nations, we say, that near those years, or in one of them, there seems great tranquillity and peace, either then to flourish, or to be near unto *Europe*. But in regard ♃ is now in ♈ unto ♅ and ♃ in ♀ as in 1603. — there will be many differences, lets and impeaiments. *per Lunares homines*: viz. by the Clown or Common Man, Artificers of all sorts, Seamen &c. principally grounded upon Religious pretences; but it being not our intencion to wade further at this time into the prognosticque part of this little Conjunction; we acquiesce and proceed upon the *Sun* his entrance

### *Astrological Judgments.*

trance into  $\Upsilon$ ; wherein if  $\varnothing$  be admitted to be Lord of the figure, a sad sickly and wofull time will follow in this year, and the Commonalty of most Countreys, by sicknesses and other detriments be in great Calamity, many of them intollerably suffering by their sursetting the year preceding, the sursets taken from that years unwholesomeness now breaking out to purpose, into Dropsies, Agues, Coughs, Consumptions, Tympanies, the Pestilence and Plague, and such other distempers as the Physicians will be puzzled to find out a Cure for the disease; ere some thousands are sent unto their Graves, the people being taken with lameness in their joynts, melancholy diseases, great obstruction in their Breasts and Stomachs, Pitsicks, and lameness over the whole body, putrification of blood, Cramps, tedious Agues, lingring Coughs &c.

We have many reasons inducing us to believe this a sickly or unwholesome year, for in the preventional Lunation we find  $\hbar$  in the first house, and therein *significat maiorem multorum hominum causa debiti vel causa terrarum* — viz. men or the Common man shall be much in that year afflicted, by reason of his debts, and ill products of his lands, intimating no very profitable year or comfortable crop unto those Grand Farmers or Husbandmen, who occupy great Farms or much Lands, and are much indebted, as also that many sorts of people will for their Rents or arrear of Rents be arrested, molested and imprisoned; in this figure also *Mercury* is Lord of the sixth, verily its like to be a sickly time. In the Vernal figure  $\hbar$  is in the 4th. wherein he signifieth, *Destructionem edificiorum, & depopulationem terrarum; & detrimentum seminum & thesaurorum, impedimentum in agricultura ab hostibus*; assuredly those judgments may prove oraculous, viz. that many buildings will be demolished, many Countreys, many Towns depopulated, no profit of the Country-mans Corn cast into the ground for seed, a Consumption of the Treasure or estate of many persons,

## Astrological Judgments.

those Aphorisms significantly appertain unto such Countreyes as wherein there are Armyes either quartered already, or where there may in this Summer be any motion of Armyes, or an Army make sudden irruption, for therein, viz. those Countreyes, it cannot be denyed, but that there will be consumption of the Princes Treasure, as also depopulation and depredations to succeed in his dominions; these Calamities be remote from England, or more properly towards the Eastern-Countreyes, verging unto the South, for  $\hbar$  hath South declination, and is near entring a Tropick Southerly sign, this judgment is the more to be feared or suspected, because  $\zeta$  separates from  $\odot$  of  $\odot$  unto  $\square$  of  $\hbar$  carrying the influence of dissatisfied persons unto  $\hbar$  a malicious planet, and underhand-working planet, from thence it may be feared, *Malum esse magnatum atq; nobilium in illa revolutione, & ipsorum terrorem, & quod non benè se habebunt cum rusticis seu popularibus, & quod male participabunt in simul*, viz. the sad and fickle condition of great men, Nobles and others in such a Revolution, is to be fear'd, it manifests the great fears such men are in, or that the downright Countryman will little respect them, as also that they, viz. Noblemen, will illfavouredly agree one with another, even jarring, and jealous one of anothers greatness.

The diseases of this year do seem to afflict the Youth or Children of Nations rather than the middle aged person, also very Old men and women are like to be passive in the Consumptions and other casual sicknesses of this year, the one part of these is from  $\varphi$  viz. the youth, the elder from  $\hbar$  and  $\zeta$  who is in the very last degrees of Sagittary, subterranean, and in the 4th. House entring her detriment; but because  $\varphi$  in some nature hath a little to do, this Vernal quarter in the actions of Great men, part of these distempers shall as well befall the Nobility or Gentry as the Vulgar person, having reference unto the Age of either party as aforesaid.

During this Vernal quarter, here is signified great diminution

### *Astrological Judgments.*

minution or distribution of the Treasure of Princes, by reason of the Souldiery under their Commanders; here appears also great deficiency in some Commanders, for which either degradation or disgrace follows; here are many complaints against the unrulyness of the Souldiery, against their Debaucheries, their Licentiousness, their Drunkenness and wanton lives: here are many Scribes and Secretaries employed, many Lawyers engaged one against another, sad accusations of women against their hard-hearted Husbands, and of men against their dissolute Wives, the Magistrate wearied with Complaints of such matters, and the Complaynants themselves tyred with long and wearisome attendances to little purpose.

An appearance of many mens transplantations out of their native Countreyes unto the *West-Indias*, or other remote parts of the World, many seem lately departed, great horror possessing mens minds, fears, jealousies and what not? many considerable persons miscarry in Child-birth, many debauched persons dy of the *Neapolitan* disease, and of greivous surfets, the High-ways infested with Thieves, and mens houses in continual danger of breaking open and of being robbed, many such unhappy casualties are like to be frequent in most Countreyes of *Europe*, as well as some part of them here in *England*, for we do not now particularile *England* onely, but also most or all other Countries adjacent or in *Europe*. But, to the ☿ ♃ for the influence of this late Conjunction seems to astonish all the Princes of *Europe*, and as it affords them plentiful matter for discourse or Counsel, so doth it much more make them amuse at the present Action; the Eastern parts will be sensible of warlike Actions. The Western of the Consultations, the Northern parts of Traffick, the Southern of Navigation, Discoveries and plantations; wherein there will happen many disasters, many damages by Shipwrack, if not some by *Piracy*; for as great profit will arise unto some Merchants by their adventures into the Southern parts, so doubtless will much dam-

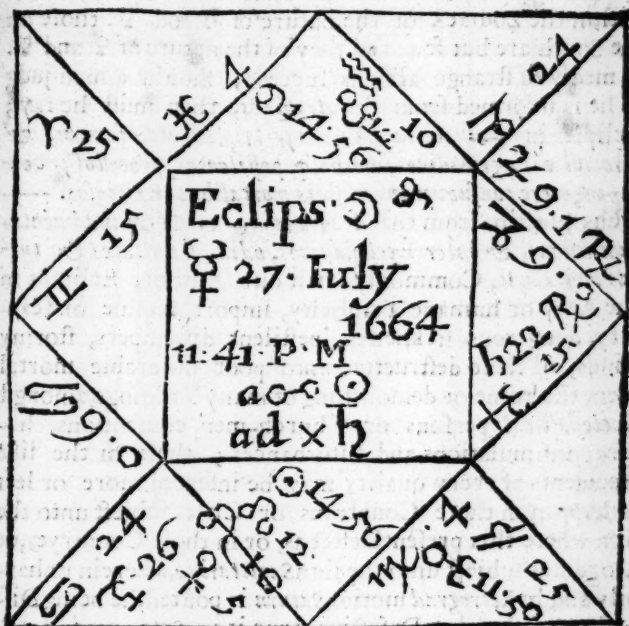

### *Astrological Judgments.*

mage happen unto others in those voyages, they shall make unto the East or South-East parts of the World; in this Judgment we are general unto all Traders into those parts of any Country or Nation whatsoever besides English; he was even ready by his motion to leave *Sagittarius*, but Providence ordains his return into that sign again, many are the afflictions of the *Spanish* Nation and *Monarchy*, and other remote *Eastern* Countryes, who seem more principally intended all this whole year, than any of the *Northern* or *Western* parts of *Europe*; for its probable that no sooner one Enemy or Army is departed out of some impoverisht Countryes, but another enters and sweeps all away, every new Army being comparable unto one of the ten plagues of Egypt. Here doth not appear unto the Church or See of Rome so great danger as hath been hotly and seriously related, either the prayers or the tears of the Church, yet seem to prevail against all assaults of Enemies

The

# Astrological Judgments.

The digits eclipsed are 15. The duration is 4 h. 11'. it begins 9 h. 24'. PM. ends 13 h. 36'. PM. its effects continue 4 Months.

Its a very great and total Eclips, if the ayr be clear it will be apparently visible all over *England*, and if Eclipses have so great operation as our Predecessors have informed us, then its not to be doubted, but the influence of this present Lunar Eclips will very strongly and strangely manifest its effects, other configurations concurring; but its not possible in so small a peece of paper to divulge all our Conceptions from hence, &c. Its in the third part of the Asterism of *Capricorn*; both the *North* and the *South Constellations* are harmfull, destructive and malicious; those fixed Stars on the *North-part* being

### *Astrological Judgments.*

being most of the nature of *Mars* and *Mercury*, those within the Zodiack of the nature of  $\text{♂}$  and  $\text{♀}$ . those on the South are but few, and they of the nature of  $\text{♀}$  and  $\text{♀}$ . A medly of strange actions succeed, should a man judge as he is informed from the *Arabians*, then must he say; Eclipses in — *Aeria humanaq; triplicitate, famem, & atrocissimas agritudines, morbosq; pestilentes, procellosq; ventos ingerere consueverunt miseris mortalibus Exitiosos.* — Thus Junctin, from the *Arabians* — as also *fundamentorum ruinas, & inter Ecclesiasticos, odia, similitates & turbas irritabunt*, Commonly saith our Author, Eclipses in the Aery or humane Triplicity, import famine or scarcity, dangerous sicknesses, pestilent distempers, stormy winds, all these destructive unto poor miserable mortal men, the ruine or demolishing of many buildings, amongst Ecclesiastical persons or Church-men, contentions, hatred, dissimulations and disturbances; these or the like Accidents of every quality may be inferred more or less to happen in those Countreyes or Cities subject unto the sign where this present Defect is, or in those Countreyes, or Kingdoms subject unto the sign *Sagittarius*, wherein unhappily and by Retrograd motion *Saturn* is posited, he being Dispositor of the place Defective; true it is, *Saturn* is in an ill Angle, yet *Planetae occidentales vel Retrogradi minuunt futura.* viz. being not onely occidental of the Sun, but Retrograd, doth in part manifest these future contingencies to be less than otherwise they would.

These accidents must be understood to happen in those Countreyes subject unto the sign, and unto that Triplicity the sign is of; and also it is to be considered, that where there is any Rebellion, or any Armyes, or any scantness of Provisions, or where Towns are besieged, in those Kingdomes or Countreyes, or Cities, its intended we say by the Antients, that there the Calamities presignified might operate fully, and with strong vigour; in other places though subject unto the same sign or Triangularity, such Eclipses onely begin some distempers, which

### *Astrological Judgments.*

which afterward being seconded with malevolent configurations break out into such Sickneses, such Casualties, such Actions, as are above-specified: we do affirm upon our Experience, that all the whole doctrine of Eclipses ought to be corrected, and that they do not so violently operate as hath been averred by the Antients; for those experiences we have from old Writers, were composed when every petty Country had either a King or Governour, who were ever and anon in Arms one with another; but of this subject and all other defects observed by us, we shall in our review and addition unto our former Introduction God willing, if we have life and retirement, plentifully discourse.

According to the doctrine of *Ptolomey*, the effects of this Eclipse shall be made visible and manifest about *March* and *April* 1665. and not before, because the Defect is for the most part in the midheaven; and verily who shall observe the *Ephemeris* of that year, he shall find that upon the 19th. of *March* 1665. die ☉ ♈ is in the very degree and minute of that sign wherein now the Defect is, and h the 16th. of *March* or *Thursday* before, in the very degree of ♈ in this Eclipse, viz. 9d. 1'. ♄ h and ☿ the 22 of the same Month in partill Quadrant; all these Planets then direct, & ☉ the 25. of the same in ♋, and in ♌ of ♈.

Now therefore in or near this Month of *March* and *April* expect a beginning of those effects which will arise from this Eclipse, and they are like to be eminent and very admirable; wherein *England* in Consultations, *France* in Actions, and the *Ottoman* Family both in Action and Consultations do most appear upon the Stage of *Europe*; the planet *Mars* seems to threaten the Antient Inheritance or Countreys belonging unto the hereditary right of the House of *Austria*, viz. *Austria* it self, upper and lower, not in that Month, but from the Counsellors of that Month, it may be then and in that Summer that there will be demolishing of Houses, Castles, Forts, destruction of Families &c. want of provisions for mankind, by reason either  
of

### *Astrological Judgments.*

of Armyes near these places, or an unkind Summer &c. or the depredations of Enemies in the former year, which is like to be true.

The principal Kingdomes or Countryes subject unto the Aery Trygon, and which may be passive from this Eclipses effects, are some parts of *Tartary, Croatia, Westphalia* in *Germany*, *Piemont* in *Savoy*, *Valachia*, the higher *Austria*, *Alsatia*, *Vienna*, *Lumbardy* in *Italy*, *London* in *England*, *Spain*, *Silesia*, *Bohemia*, *Hungaria*, *Flanders*, *Moravia*, *Dalmatia*, *Slavonia*, with many other Countryes, Cities, Counties and Provinces, not as yet assigned unto any Sign, by reason many do scribble, translate, but few are capable of the rationality of *Astrology*.

Forasmuch as the Sign defective is Aery and Humane, and the place of Heaven wherein it is, is a Noble House, glorious and eminent, theretore Astrologers say, that men, rational men are a great part of the Subject matter intended from this Eclips, their quality *Emperours, Kings, Princes, Dukes, Counts, Earls and Barons, Lords of Mannours, Gentlemen* of the best sort in all the habitable places of *Europe*, verging towards the West and North-West parts of *Europe*, but South-West from *England*, and South-East; the age of these great men, whether Officers of Armies, or otherwise Civil Officers in any Courts of Judicature, are represented to be of middle Age many of them, some signified by *Saturn* of more Age, viz. 60. --- 63. --- 65. and near 70. ; for *Saturn* is descending under the Earth, and in the Occidental quarter of Heaven, and after his direction makes hast into his own Earthly sign *Capricorn*, as these men signified by him must leave this Earthly Ayr, and descend downward, or in plain terms mother Earth must receive their bodyes, and as *Saturnus* is Lord of the 9th. without doubt the Ecclesiastical Tribe, or men in Orders, viz. *Cardinals, Arch-Bishops, Bishops, Deans, Masters of Colleges, Officials, Abbots and Priors, Men in Authority, Doctors of the Civil Law, Judges of the Law-Road*, all these and of every Order,

### *Astrological Judgments.*

der, many of them are presignified to dy from diseases, such as are mentioned already, many also of meer old age, and also very many of middle years, during the operation of this Eclips; for generally *Saturn* by reason of his coldness and enmity unto nature, is the cause of corruption in mens bodyes, and declares old continued diseases, wasting and pining away by degrees, by sorrow, care, melancholy &c.

From deflux of Rhumes, Fluxes, Quartan-Agues, Poverty, loss of Estate, lingering Consumptions, Mortalities, scarcity of food and natural conveniencies: he is like from our Position in this defect to destroy the greater Cattel, by reason of ill usage, sursetting themselves by over-much labour, and then feeding on unwholesome food: he stirs up uncomfortable weather, cold-mists, early-frosts, cloudy weather, unfavoury East-Winds, abundance of Snow, Frost and Ice; on the Seas he stirs up sudden Tempests, *Herricanos*, over-whelming Ships suddenly, occasioning thereby great dammage unto the Merchant: the grass he prejudiceth with unexpected floods, the fruit he destroyes with noysome Caterpillars, *Hail-storms*, *Blasts* of North-East-Winds; very many long and tedious Law-Sutes amongst Country people, much harm amongst *Miners* or in the Lead-Mines, Tin and Coal-Mines, strange breaches of the Sea-Banks, many whereof perchance may afflict the Low-Country Territories ere the year 1665. is ended, being signified from the effects and influence of this Eclips; all the evils intended from this Eclips will be something less than expected, because of the Reception of  $\text{h}$  and  $\text{v}$  by House, which is indeed the strongest Reception; so that generally the influence of this Eclips doth continue the mischiefs visible or in Action at time of its first manifestation, be they either Negotiations for Peace or breach of friendship, or War, Rebellion, during the full time of the four Months to be accounted from *March* and *April* 1665.

Its

### *Astrological Judgments.*

It's the ☾ who is passive in the 10th. House, the Sun is in the 4th. many Stratagems concerning the taking or beleaguering of Towns, Castles, and Forts, will be used, very much fraud, very much Treason in the Chief-Officers and Souldiers of Forts, surrendred basely and cowardly, when no necessity inforceth; high enmities in Princes Courts, strange and malicious information of one great person against another, the Clergy will be accused and slandered, the Reverend Pastors of Churches disgraced, the Common people complaining, inclinable unto Commotions, the Souldier in many places cowardly, having no mind to engage against an Enemy, Children and middle aged men dy of strange diseases, Old men end their dayes by such lingring distempers as have not been usuall,

We might be more copious both upon the Conjunction of ♄ and ♀, and of the position of heaven, of the Sun his Ingress, and this total Lunar defect, but we are confined expecting from a friend a particular Treatise of ♄ and ♀; and do therefore refer the Reader into his judgment thereon, and unto our Monthly observations, onely let us consider that the ☿ of ♄ and ♀ is in the second part or middle of the Asterism of the Scorpion, wherein there are some fixed starrs of the nature of ♄ and ♀: there is nothing more to be misliked in the ☿ of ♄ and ♀ then the ☾ her being in II and application into the opposition of those 2 superiour Planets; An unruly vulgar people labour their own Destruction, by opposing all Men, all Authority not corresponding with their own Judgments in Religious and Divine Matters; from hence follows strugling and Controversies with their Superiours, disobedience and contempt of Magistracy, and in the end confusion of all Civil Government would follow, if the wisdom of a wise and sober Authority did not prevent these tumultuous peoples exhorbitanees. Some there are who have lately in the German and Latin Tongues (lately Englished) published a few Animadversions

## Astrological Judgments.

ons concerning the being of all the Planets in the sign  
*Sagittarius* on the first of *December* 1662. and would from  
 thence infer great Changes to follow (as in truth there  
 will) but not such as they surmise, viz. A total destruc-  
 tion of *Monarchies* all over *Europe*, and the whole Go-  
 vernment divolved or put into the hands of such Saints  
 as they profess themselves to be, or are in opinion, viz.  
 Fifth-Monarchy-Men; its probable this simple Astrologer  
 is a Gibionite, and lives amongst us, what his under-  
 standing is not capable of, let let him receive from such  
 a prodigious  $\odot$  of former times, viz. In the year 1524.  
 and the Month of *February*, there was all the Planets except  
 $\odot$  in the preventional lutation of that year in *Pisces*, and  
 in the 9th. House of Heaven, both the Lord of that sign,  
 viz.  $\mathcal{V}$  and that house signifying things and matters ap-  
 pertaining to Religion. Upon the meeting of so many  
 Planets in *Pisces*, some inconsiderate Astrologers in those  
 times affirmed a second Deluge was at hand, terrifying  
 many Country people therewith; the 5th. of *February*  
 preceding viz. 1524. there was a  $\odot$  of  $\mathcal{H}$  and  $\mathcal{V}$  in 9 d.  
 58' *Pisces*, and  $\odot$  in 7  $\mathcal{H}$ . The accidents which really  
 succeeded (not wholly arising from those Conjunctions)  
 were these, which in very few years after that Congress,  
 and the partill  $\odot$  of  $\mathcal{H}$  and  $\mathcal{V}$  in that sign, viz. in 1525.  
 fifty thousand *Clowns* or *Peasants* were slain in *Germany*  
 in a Commotion.

The Anabaptist judgment enlargeth it self into many  
 Countreyes, and *Rome* was besieged, taken, and ransacked  
 10. whole Months by the *Duke of Burbones* Souldiers.  
 Many Consultations presently after about Religion, great  
 Controversies betwixt *Luther* and others. A *Council* at  
*Sena* about *Reformation*.

The great Sweating sickness in *London*, *Vienna* besieged  
 by *Solomon*, *Florence* was taken by the Imperials, the  
 greatest busling or Action in all *Europe* was concerning  
 Religion, during 8 or 10 years after that  $\odot$  of  $\mathcal{H}$  and  $\mathcal{V}$   
 and concourse of so many planets in  $\mathcal{H}$ .

We

## *Astrological Judgments.*

We have sincerely mentioned these Accidents, fearing such like imprudent Actions may ensue within some years after this present & that thereby the sober harmeles Country man may be wary and terrified how he associate himself either in Action or Counsell with turbulent Spirits, who under pretence of Religion, endeavour Subversion of Government, and even all Religion, who usually for their reward, and head-strong forwardness in the conclusion receive slaughter and Hanging.

*Petro Sevario* (if he be not a Cheat) Author of that late Pamphlet (as is said) called *AN AWAKENING WARNING to the WOFUL WORLD*, will evince from the ☿ of ♄ and ♀ 1663.

1. That the glorious coming of Jesus Christ is at hand, *vix credo*.

2. That he will recollect the dispersed Nation of the Jews viz. if he can find them.

3. That he will abolish the man of Sin, who hitherto hath obtained the Principality as well in the Church as in the World; this is intended of the Pope, whom those men understand as well as *Bevis of Southampton*.

4. At length erect his glorious Kingdome on Earth, they mean a temporal Kingdome, contrary unto Christ his own expresse words. *Amsterdam 1662.*

All these he would prove to be evinced as well by *Scripture* as from the nature and influence of the Conjunction it self &c.

An high soaring conceit this is, repugnant to all the wholesome Rules of Astrology, disowned we may justly aver by all Christian Astrologers, who onely from Natural causes give Probable conjectures of Natural Con-  
tingencies, happening either unto man, or upon humane general Actions.

There being so many learned Divines in this Nation as now there is, we hope, if the former Positions be worth answering, that some of them will give the world satisfaction by their learned pains, concerning the last Position,

## Astrological Judgments.

tion, viz. of Christ his glorious Kingdome upon Earth, which those people fancy to be Temporal. but, *Ne Sutor.*

We draw near unto Conclusion; and do affirm, that notwithstanding some most ignorantly have averred, that this Conjunction of *Saturn* and *Jupiter* is such a one and so great as doth not happen but once in 7 or 8 hundred years, thereby amusing the vulgar man with prodigious expectations of rare and admirable Events, even unto amazement, yet we say, this Conjunction now lately happening in *October* 1663. was no more than one of the least of those Conjunctions which shall be in the fiery Triplicity, for some years yet succeeding; the next little Conjunction of these two Planets will be in the fiery sign *Leo*, in the year 1683. and in the 15 degree, 3 min. 22". 13 thirds thereof, the 12th. of *May* 1 ho. 42. min. PM. that being the apparent time of their Conjunction according *Bullialdus* at *London*, 26 deg. and 21 min. of *Virgo* then ascending.

A friend any time these 2 or 3 years, promised a particular Treatise of this last Conjunction, lately he tells us its finished, but not yet printed, we doubt not but when his labours do appear, he will give ample satisfaction concerning such effects as may naturally arise from thence; had we not expected his industry to have appeared ere this time in publick, we would have been more copious.

In the interim, we complain unto all Students in Astrology, of that slanderous aspersion cast upon us by *J. G.* in a late thing of his published, who being my Taylor from 1654. unto 1658. is not ashamed to commit to the press, this most egregious untruth, viz. That *Richard Gresham* was Author of the *Prophetical Merlin*, which was a Treatise of the effects of the last Conjunction of  $\text{♄}$  and  $\text{♃}$  1642. or 1643. and wrote by us in 1641. 1642. 1643. and published 1644. The truth is thus ---

*Richard Gresham* died about the year 1616. left nothing

### *Astrological Judgments.*

fixing to posterity in print but some Almanacks; if he wrote any thing of the *Prophetical Merlin*, he was the greatest Prophet ever lived. For we quote several books printed after his death, viz. *Keplers Epitome*, printed 1623. *Campanella* his *Astrology* printed 1630. *Alstedius* printed after that year: and relate unto the page in every book; we mention *W. Laud* Archbishop of *Canterbury*, The Lord Chief-Justice *Finch*, The Earl of *Strafford*, these men had no honour in *Greshams* times; we mention the death of King *James* not dead in *Gresham's* time; we mention the Comet of 1618. which appeared not till *Gresham* was dead; we mention Dr. *Bainbrig* who wrote of it, and of its declination every day; we mention *Longomontanus*, the Death of Queen *Ann*, who died 2 years or more after *Gresham*, also several other persons; we take notice of the then present breach betwixt King and Parliament, which was 25 or 26 years after *Gresham's* death: *Oportet mendacem esse memorem*, but we are not disposed to quarrel with our *Quondam* *Taylor*, the most Ingrateful person living.

*Nec mea fert ætas juveniles edere lusus,

*Januaryes Observations,*

**T**He Actions and Counsels depending on this Months Configurations, do seem wholly to concern the French Monarch; his Souldiers in garrison or quarter, but in more remote parts than any in *France*; it may be doubted those *Martial* Souls are in distress, and that some special order is taken for their recruiting: however some reflection there is upon the French Honour.

Here is an appearance of motion of Armed men, or their dislodging and discontent, for being tossed from one place unto another. Great preparation for Shipping towards the Southern parts of the World, we mean *Ginny, Barbadoes, Brasile*, and those parts, or those other Islands subject to *Englands* Monarch.

A probability of friendly understanding betwixt *France* and the *See of Rome*, or those differences now seriously discussed by persons wise and prudent, *Martial* and Religious; for let *Pope Alexander* lose or suffer what possible he may by the French, there's more than probability by Treaty he recovers all ere 1665. or will the year 1666. much hurt that See.

Malicious consultations, close and treacherous are providing matter, witnesses, writings, and things against some persons of Quality; the Armed man is for peace, so the Religious; here seems an Union or Harmony among many, and as great preparations of animosity amongst others.

The Italian Princes in some fears; not very pleasing intelligence should arrive from the *Straits*; some losses are feared, yet near the Months end, more pleasing letters arrive. C 3

*Februaries Observations.*

**S**uperlative Discords, Quarrels, Duels, or Roberies on land, if no Pyracies at Sea, do begin the month; and not long after where royal or great Armies are at hand, it may be doubted some slaughter follows, wherein many generous souls of great rank and quality perish, partly by Stratagem, partly by Cowardise and Treachery of some wilfull Commander: It may be feared some new stirs or differences arise, or are at hand in the *Po'onian Territories*: Nearer hand, preferment is bestowed on some Honourable Long Roab man, perhaps it will be *Ecclesiastical* Honour on some Reverend Church-man.

In the Air great commotions of unhappy winds, whereby the Merchant receives prejudice, and many others seem to receive much harm in their Estates by the unseasonableness of the Air and Weather. The Emperor much concerned, if not astonished, at his present warlick affairs, if the season permit, there's probability of Action in those Countries: News should arrive from *Portugal* or those Coasts, that Nation have serious Counsels how to carry on the approaching Year, wherein their Puissant Adversary is making preparation; but if the time of its Restauration be exact, *Nihil timendum*, viz. no great loss or damage will succeed; from every petty disaster, there's no Prince excused. Many endeavours are used to accommodate general differences; but Revenge, Envy, Pride, and Malice, impede several intended attonements now, or near hand, in a fair way of conclusion; These things generally seem to be in most parts of *Christendome*.

*March Observations.*

SOME popular Tumults or general Disgusts amongst the *Spanish Nation*, perhaps sickness attends the Monarch thereof, and other mundane inconveniences retard his Designs. News generally near this time comes from *Italy* and those Countreys adjacent, from the poor oppressed *Piedmontan Protestants*; there's much oppression upon those miserable souls, and some other bordering *Provinces* towards the *Alpes*. — *Deus dabit istis quoque finem.*

The religiously pretending people, mutter, grumble, are obstinate, speak strangely, act rashly near these times, and yet carry their designs closely, for some they seem to have on foot. Smart difference amongst the Nobility of Nations. If any thing be designed against the *See of Rome*, its more than probable, its now apparent, as unto the matter, in or near this month, perhaps it may prove a mortality or sickness. Miserable complaints of distressed people, seems to weary the Magistracy of many Nations, whilst some for private ends, and self occasions, retard all publique concernments. However the *French* forces are not so victorious near these times, as some reports, perhaps a loss attends that people. Our *Sovereign* of great *Britain* hath his share in the Actions of this month, but he seems wholly for peace and advance of his industrious Merchants in all parts of the World; and its very like, he is much rejoiced with some comfortable intelligence he hath from *Portugal*, *Tangier*, the *Straits*, &c. or other *Foreign Nations*, &c.

APRILS Observations. 1664.

THE Heavens seem to cast oblique and crooked Aspects upon the *Spanish Undertakings*, and upon other Countries verging towards the *East* and *South-East* parts of *Europe*. Adulterate Informations, Accusations of long contrivance peep out against the Grandeur and Honour of some eminent Worthies, managed crookedly, clandestinely, and with much tautology of words, empty of truth and matter; but in conclusion, *Venus* applies unto *Jove* by her harmonious Aspect: *Venus* is strong, *Jove* is fearful: Truth hath many friends: *Jove* is exalted; for so the influence of Heaven promiset, and *Jove*, viz. Justice and Equity prevail: But, *Quibus in terris*—Some of the Long Robe highly honoured.

Great dissenting of judgments in persons of high Trust and Command; the vulgar man full of fears; the unwholesome Season nothing pleasing or comfortable; so that the Community of Mankind fears an approaching sickness as unto himself, and can promise no great soundness unto his Cattle great or small. The influence of the Conjunction of *Saturn* and *Jupiter* is yet slow in operation, rather providing matter for action then in any present readiness thereunto—A kind of silence or dull melancholy seems to possess most Nations; every State careful of his own welfare, and warily observing this Summers intended Actions—Great *Britains* King seems provident, and carefully providing for and sending His warlike Ships into the *East*, *South*, and all parts where there is hopes of Honour or Profit.

**M**Any former under-hand Actions do now visibly appear, and seem to have countenance from Authority: In several Countries Armies are in motion, drawing together; an high Martial design in hand, managed wisely and prudently, but not seconded with valour or success: From thence arise sundry and various accusations, one impeaching another of Treason; and it seems the *Imperial Monarchy* suffers thereby, so also the Forces of the *See of Rome*, if they are engaged in any Conflict. Stragling Reports are vented concerning *Ireland*, and its uncertain condition, as if there were intentions in some unquiet people to molest His *Majesties Grandeur* and quietness; however, there is lurking some Plot, some fool-hardy Design to set Division, to disquiet Authority, to raise scandals against the Fathers of our Church. From the *Barbadoes*, *West-India* Plantations, *Jamaica*, *Tangier*, and other parts of the world, Providence seems to bless His Majesty with comfortable News, and if the Pestilence and other enormous diseases, as the Plague, and strange Fevers consume not, or afflict His Majesties Subjects at home, he will have a Moneth full of content.

The *French Affairs* in a doubtful condition; from *Spain* ambiguous Intelligence; in or near *London* many do fear a sickly Summer is at hand: God divert his Judgments, and give peace unto all Nations under the English Monarch: There is great affliction ready for some sturdy people of *Europe* both by Land and Sea.

## JUNES Observations. 1664.

IN those parts of the world where the unruly Martial man hath power, near unto or in this moneth, those unhappy Souls or Countrey people suffer, *Multos labores in rebus suis, tristitias & damna ratione carcerum & similium, & depopulationem villarum & civitatum à quibus discedent Gentes, & ibunt ad alia loca*: Many are the hardships, the labours, the sorrows, the losses, the imprisonments these rural people are afflicted with; many of their Cities, Towns, Farms, yea whole Countries depopulated or quite ruined, or inforced by the Plague and other inconveniencies to transplant or remove themselves and families from one place unto another, &c. If the *English* could be sensible of their own happiness by living in peace under His Majesty now, when almost every Nation is something involved in one mischief or another, they would more seriously acknowledge Gods goodness, and with more obedience serve their Superiours. The *Hollanders* either from their Fleets at Sea or otherwise have but sad News; generally that peoples greatness declines, and their Subjects weary of their present condition. The *Nobles*, the *Gentry*, the *Ecclesiastical Party*, have now many differences amongst themselves, which gives occasion to the rural man to sleight their Greatness and Authority—Many whispering reports as if *Scotland* were dissatisfied; Church Censures begin to affright men, at which some repine, others flye out into passion, and with scandalous invective papers reproach the whole Clergy—Wavering and uncertain Intelligence concludes the moneth, as if great mischief or slaughter had lately befallen some Army, or Armed Troops.

JULIES Observations. 1664.

IT is feared the *Argier Pyrates* with their many Ships do molest the general Traffick of Nations, within the Straits, and all along the *Coasts of Spain*, and those parts of *France* near unto *Africk*. The *Ottoman Family* and *Venetian State* appear formidable with their Fleets at Sea; so also the *Hollander* is enforced to send many Men of War towards those Seas, being wearied with the sad complaints of their numerous Sea-men, who seem much endamaged by those Pyratical people.

The approaching total Lunar Defect threatens the Courts of Princes both in *Italy* and nearer *England* with strange and unusual Animosities, where-with they are much tormented, even to the great molestation of *Kings, Dukes, and Princes* themselves; the *Courtiers* or *Attendants* disagreeing, envying each others greatness. High differences, or many curious and unnecessary *Niceties* offend the *Episcopal Party*—Many and very grievous *Robberies* afflict the poor both at Sea and (especially) at Land, Houses, Shops, &c. broke open, murders on the High ways, &c. and, which is worst, some unusual sickness appears, to the consumption of many distressed people.

Thunder, lightning, storms, tempest, and what not mischief appears now more frequent then ordinary, to the great disquiet of the Husband-man: And now, without Gods great mercy, the House of *Austria* suffers by Armies, or that *Monarch* his Territories are near unto danger; perhaps some set Battle is neer at hand, or surprize, or besieging of a City.

# AUGUSTS Observations. 1664.

**M**En, Armies, Provisions, all things seemingly tending unto War and Actions: A more happy understanding is signified to be amongst the *Germane Princes*, and a better concurrence or union amongst the great Persons of *Transilvania*, *Hungaria*, and those other unhappy Countries threatned neer these times by the *Insulting Ottoman Monarch*, whose numerous Forces seem able to afflict the Eastern parts with all the Calamities War can produce. Some City or famous Castle or Fort in agitation to be besieged, or some Town beleaguered, it should be not far from *Vienna*, or in that Country where that City stands: God defend that City it self the former part of this year, or now.

Worthy and wise persons employed, if possible, to accommodate the general differences of the present times, some hopes we have their Consults in time may produce a good effect, at present we are dubious, nothing is concluded. The Nation of *England* hath various reports from most parts of *Christendom*, in general good; nor doth there seem any serious giddy Delign in Consult, to disturb His Majesties peaceable Subjects: Only various News come from *France*, as if all things there were not in so high a condition as to answer the great soaring thoughts of that high-spirited Monarch. Very great hopes we have of the happy return of many *English* Merchants Ships well laden into *England*, and its several Havens or Ports, in or near this month.

**T**He general Affairs over all *Europe* now draw near unto Action: An appearance here is of the motions of great Armies, and some warlike Action or Battle near hand: The minds and dispositions of people almost every where expecting great matters very suddenly. The Seas seem in some parts to swell or be proud of receiving so many gallant Fleets upon her Waves, and much probability we have to hear of some Sea-fight or Sea exploits in or near this moneth.

*Religious Tanglings, Wranglings*, or vain disputes concerning Divine matters much trouble the brains of dissatisfied Humours, and those act or write something to the vexation of *Orthodox Ministers*; perhaps they are now made sensible of *Canonical Censures*. Great fear we have of the *Imperial Dominions* and *Papal Territories* near this moneth, lest some parts thereof may receive damage by or from the Souldiery. We hope well of the Affairs in *Portugal*, wherein or near whose Confines there's an appearance of War and Action; if the time of that Kingdoms *Restauration* was rightly given me, then we hope there's no danger towards that Kingdom; nay, there's great hopes of very numerous and happy returns from her *Brasile Plantations*, of the certainty whereof it seems plenty of Intelligence comes into *England* near the latter end of this moneth.

# OCTOBERS *Observations.* 1664.

**I**F unseasonable weather do or did not impede the fiery spirits of some Martial people, here was then very like to be some Field fought, or some strange Martial Stratagem put into design if not execution: We finde the strong inclinations of some Martial Princes animated unto a strange pride and haughtiness, with a zealous or furious desire unto Action: We believe Providence designs strange floods or inundations near the time of Action, and so, much humane blood thereby will be spared; God grant it: Yet it may please God the Imperial Army near this moneth may repell or overthrow an invading or disturbing Army of Infidels or *Tartarian Thieves*; such we account little better then Brutes.

Slender Advancement is now conferr'd on many, neither very pleasing or profitable unto the Receivers: Great are the expectations in the Western parts of *Europe* what will become of the concluding Actions of this Moneth: Very frequent News arrives, and it seems not pleasing unto the repining judgments of many humorfom people, who now much complain for want of Trade and want of monies, though no sensible damage or loss seems to have lately happened unto them. Some do judge, *Captio multorum pecorum in pluribus terris, multa pugnae, pluvia superflua, & multa inundatio aquarum, viz.* in several Countries many Cattle will be lost or stoln, many fights or quarrels, too much rain, and much inundation of waters: *Caveat Hollandia.*

# NOVEMBERS *Observations.* 1664.

**T**He Clergy and persons of the *Long Robe* much concerned in this moneths Actions, by reason of many complaints either against them or their subordinate Ministers: Indeed there is appearance of some Design to scandalize the *Orthodox Clergy*, done of set purpose, and countenanced by many people of seeming good quality. A rumour or rumours dispersed as if some Commotion or unruly Assembly were to be expected; *Ex populis multa frans*, great deceit and subtilty appears in the vulgar man. Part of the effects of the *Conjunction* of *Saturn* and *Jupiter* in *October* 1663. do now operate in Council and Action in *Spain*, in which Kingdom something more then ordinary near this time doth happen, either as unto the life or death or very great sickness or strange Casualty unto either the Monarch himself, or a most eminent person of that Nation. Mens dispositions incline unto sedition and mischief, yet their rash actions are prevented by the Nobility and Magistrates of several Countries wherein some such mischief might happen. Probably sad weather, high winds, sudden storms, if not evil News from the *Spanish* Coasts of losses, damages, &c. do conclude the moneth: But the *English* Nation by Land suffer nothing more then in extraordinary and unusual robberies on the common High-ways, with much differences of persons of quality, if not Duels, wherewith the Civil Magistrate is offended, who therefore justly brings many guilty persons unto condigne punishment.

## DECEMBERS Observations. 1664.

[The Year 1664. draws near unto an end; so also do some ancient Senators or Grandees approach near unto their Graves; nay, *Saturnus* is leaving *Sagittarius*, and entering the cold Sign *Capricorn*: Many old people dye; many young persons, Gallants, &c. advanced unto great Estates and Fortunes.

Rumours from *Scotland*, as if some Clergy-men were disturbed in their Functions.

*Bella inter Reges & Nobiles adfutura creditur*: No such firm peace is yet concluded as is desired; for its feared more War is approaching towards the Spring of 1665.

*Mors Regum vel Principum, contemptus religionum, piorum persecutio, cum grandinis, nivis, & nemis asperitate sequitur*. Many of Princely or great Families dye; the Religious finde contempt; some for their judgments are persecuted or molested; troubled spirits molested or questioned. Sharp weather, a strange Winter. Men doubtful of a Famine or scarcity of provisions in the year ensuing. Great returns of Ships and Sea-men from the *West-Indies* and *Southern* parts. May His Majesty of *England* enjoy prosperity, his Subjects plenty of Trade in all habitable parts of the world. *Amen.*
